Emergency Smart Collar

Emergency Smart Collars are the perfect solution to effectively identify animals for everyday use, emergency planning, or disaster response.

This cost-effective product will ensure a smoother and streamlined process when out in the field. You only need a cell phone with a camera or NFC compatibility to scan or create a pet's profile.

Emergency Smart Collars can be used in place of GPC Smart tags and quickly and easily placed on most animals. These writable, durable paper collars can be sized to fit any animal and enabled with QR/ NFC technology. Each collar is compatible with GPC Smart App to identify animals and enter them into the database to be tracked through the system and assist with reunification to owners.
